Discussion time : 4 minutes

Role play time : 2 minutes

Discussion

1. What is the weather condition and the warning signal?
2. What dangerous will the character faced under their action?
3. What should they do/ the correct response of the characters during the warning signal of weather?

Role Play

1. **Weather Reporter:** Report the weather condition.
2. **Weather Actor:** Act as the weather.
3. **Character:** Act as the characters in different cases and show the dangerous they faced. Also, act what should they do under these weather conditions.

Role Arrangement

Weather Reporter: 1
Weather Actor: 2
Characters: rest of the groupmates

Case 1

When **No.8 Tropical Cyclone Warning Signal** is issued, there are gale and heavy rain. Some students are going to seaside to watch the sea waves.

Case 2

There is heavy rain when **Red/ Black Rainstorm Warning** is issued, but the cycling team members are still having practise for the competition on the next day.

Case 3

When the **Cold weather warning** is issued, a thin layer of ice is formed on the ground. Peter's family decided to go hiking to watch frosting.

Case 4

When the **Very Hot Weather Warning** is issued, there is strong sunlight while the whether is 35 °C. The long-distance running team is going outside for practice to prepare for the Marathon.
